

Nur fatihah Damayanti

Frontend Developer

Depok, Indonesia [\(+62\) 89 50966 2936](tel:+6289509662936) | fatihahdamay2@gmail.com | [LinkedIn](#) | [Github](#)

Software Engineering student at Taruna Bhakti Vocational School Depok with a strong interest in Frontend Development, having hands on experience building responsive and interactive web applications through academic and personal projects. Familiar with translating UI/UX designs into functional interfaces, with additional exposure to Backend Development and UI/UX Design. Eager to keep learning and growing in frontend development while contributing to real-world projects.

EXPERIENCE

■ 2024

SMK TARUNA BHAKTI DEPOK

UI/UX Designer

Began learning UI/UX design through wireframing, user flow planning, color theory, icon selection, and prototyping. Applied these concepts in various academic projects, including e-commerce and portfolio website designs, with a focus on usability, consistency, and user-centered design.

■ 2025 – Present (Personal & Team Project)

SMK TARUNA BHAKTI DEPOK

Software Developer

Focused on Frontend Development by learning modern web technologies and building responsive user interfaces. Developed a web-based library management system using Next.js and MySQL, implementing features such as book management, borrowing records, and user interactions while improving problem-solving and web development skills.

■ 2026

SMK TARUNA BHAKTI DEPOK

Frontend Developer (Mobile & Web)

Currently developing a multi-platform community reporting application for the Depok area, focusing on creating intuitive, user-friendly, and visually engaging interfaces. The platform allows users to submit public reports, view reports from other users, and interact through comments and discussions. Through this project, I continue to improve my skills in UI/UX design, responsive web development, and building seamless user experiences.

EDUCATION

2024-Present

SMK TARUNA BHAKTI Depok

Completed Software Engineering Competency Test with Score 87

RPL Competency Test - SMK Taruna Bhakti | Multiplatform Application Development | 2026

Completed Software Engineering Competency Test with Score 89

Portofolio Projects – Nur Fatihah Damayanti

Pengaduan Masyarakat

LaporinAja is a community reporting platform for Depok residents to submit complaints, share local issues, and interact through comments. Designed with a focus on usability and accessibility, the platform aims to make community reporting simple, transparent, and engaging.

[See Project ->](#)

Web E-commerce

Homely is a furniture e-commerce website focused on creating a clean, responsive, and user-friendly shopping experience. The project utilizes API integration to display product data dynamically, allowing users to explore furniture collections through an intuitive and visually appealing interface.

[See Project ->](#)

Perpustakaan Digital

LitSpace is a web-based digital library platform developed to provide easier access to library information and services for students. Built using Next.js, Tailwind CSS, and MySQL, the platform offers a responsive and user-friendly interface for exploring library resources and improving the overall user experience.

[See Project ->](#)

UI/UX Design Glow & Flow Website

Glow & Flow is a UI/UX design project for a hair care website, created in Figma with a clean, modern, and user-friendly interface.

[See Project ->](#)

Grab Landing Page

This is a project for Dicoding: building a static company profile website using HTML and CSS as part of the Dicoding web development final assignment. The website presents information about Grab, including its history, founders, and corporate growth.

[See Project ->](#)

Personal Portfolio Website

A modern and interactive personal portfolio website built using **React.js** and **Tailwind CSS**, featuring smooth animations powered by **Framer Motion**. The website showcases my profile, technical skills, achievements, and projects through a clean, responsive, and user-friendly interface. It emphasizes modern UI/UX principles, reusable React components, seamless navigation, and engaging visual transitions to create an enjoyable browsing experience.
